

Scanned Regression Fixture

Abstract

This page is intentionally rasterized. It contains no PDF text layer.

Optical character recognition is required to recover this paragraph.

The sample verifies that ordinary parsing failure can trigger OCR fallback.

Methods

A synthetic page image was embedded as a full-page figure.

The target phrase is: PHOTOTHERMAL TRANSITION UNDER GREEN LIGHT.

Results

OCR should recover headings, sentences, and the target phrase.

No private paper, token, account, or production data is included.
